DRAFT

**CAPITAL BUDGET TRANSMITTAL MESSAGE – Place Holder**

<b>Tiers</b>			
<b>Tier</b>	<b>GO Bonds</b>	<b>Other</b>	<b>Planning</b>
1	31,517,880	5,825,600	37,343,480
2	5,569,500	0	5,569,500
3	3,402,500	0	3,402,500
4	0	0	0
<b>Totals</b>	<b>\$40,489,880</b>	<b>\$5,825,600</b>	<b>\$46,315,480</b>

- Tier 1** The Planning Board recommends that the City needs to include these projects in its Capital Budget FY 2022-2023 to protect the public health, safety and welfare, or if it is a high priority project that excludes grants.
- Tier 2** The Planning Board recommends that these projects are important to include in its Capital Budget, but given the fiscal constraints on the City, the Mayor needs to review and decide whether to include these project in this year’s Capital Budget, and at what level.
- Tier 3** ARP Related Projects
- Tier 4** Due to the City’s capital budget constraints, the Planning Board did not place these worthy projects.

**Comments** - Cost includes the structure, site grading, limited utilities and (future) public restrooms, to be shared with Greenhouse. Proposed size is 50x100 feet. This project will generate return on investment through year-round usage (expanded rental use and additional revenue-producing events) as well as a reduction in costs associated with existing fundraising expenses (tents, generators, lighting, temporary flooring, etc.) Request also includes \$30,000 for new septic system by the Greenhouse. DEEP Grant of \$175k, was awarded on 3/1/2021. Bartlett Arboretum Association has raised \$125k during Capital Campaign.

**Comments** - Certain infrastructure elements date back decades: trails and bridges; well(s) water; septic systems; emergency generator for Silver Educational Center. Numerous trails and bridges require upgrade for vehicles and safe passage for hikers. These improvements would bring these facilities into legal compliance and would also allow for year-round use for revenue-generation purposes. There's an Immediate need for two bridges, that are estimated at \$20 for the small vehicular (Hurricane Ida) and \$25 for the longer span pedestrian (Hurricane Isaias). Designer will prioritize and estimate the various other bridges along the trails.

**Comments** - Two air handlers, their distribution and pneumatic controls are circa 1980; chiller and cooling tower are circa 2000; both boilers are not dependable (ages unknown). Energy Resources calculates considerable energy savings and rebates by upgrading equipment and installing zoned thermostats, variable air volume boxes and demand controlled ventilation digitally integrated by a building automatic system. (boilers and abatement are in out-year's request)

**Comments** - The modernization will provide the facility with spaces requested/needed by current library patrons and outside groups: makerspace - flexible meeting/conference rooms; tutoring rooms; technology learning spaces; defined program spaces for preschoolers, youth, teen and adults. It would be done within the current building envelope and per the Master Plan. The master plan also includes code review and an assessment and possible upgrade of the MEP systems. ADA upgrades are also necessary. Appropriate furnishings will be included. Grant funds (through the State Library and others) may be available to leverage City funds. (Recent flooring replacement was funded through private donations.) An Eversource Grant will fund lighting upgrades. Roof leaks and acoustics to be addressed. As of September, HBB is open 6 days/week.

**Comments** - Initial study of all existing and possible branches estimated at \$50k, to ensure what steps are necessary to keep the current branches operational and investigate the condition and viability of the Hunt Center as a potential East Side branch. Expect to campaign for matching and additional funds for a more comprehensive study, estimated at \$175k. Develop re-use plans for both the Harry Bennett and South End Branches. For the Bennett facility, determine options for current public demands for programming space, meeting room use, and technology applications. For South End Branch, determine best way to provide more space for this small but heavily used facility serving a growing and diverse population. Out-year capital request anticipates funding for recommendations coming from the study.

## 1258 001258 BUILDING INFRASTRUCTURE TO HOLLY HOUSE

**Agency:** 0697 Non City Agencies: SoundWaters  
**Contact:** Leigh Shemitz - 203-912-0697 - lshemitz@soundwaters.org  
**Location:**  
**Neighborhood:** Cove **Voting District:**

		<b>Dept Priority</b>	<b>1</b>	<b>Tier</b>	<b>2</b>
<b>HTE Date</b>		<b>YTD Balance</b>			
<b>Encumbered</b>		<b>Amount Available</b>			
<b>Advanced</b>	0.00	<b>Unfunded</b>			

**Project Description** - In 2000, SoundWaters (SW) raised \$2.1 million to restore and rebuild the city-owned Holly House in Cove Island Park and turned it into a community Environmental Education Center where, each year, thousands of Stamford Public School students, grades 1-12, visit to study and augment their science curriculum, all supported by SW fundraising. Each summer, hundreds of SPS students attend summer programs (where any child who is eligible for free/ reduced lunch receives a full scholarship). SW takes great pride in keeping this historic gem in excellent condition by fundraising and allocating over \$30,000 annually for upkeep (painting, roof, HVAC maintenance, etc). Additionally, SW secured over \$100,000 in Federal funds to repair the site after the damage inflicted by the Super Storm Sandy and Hurricane Irene. After 20 years, this beloved community center is experiencing the effects of salty environment, strong winds and aging systems. We are faced with the need for the two critical and related projects: replacement of the major components of the HVAC system (\$310,000) and the replacement of 39 windows (109,500). The HVAC system is beyond its useful life and can no longer provide adequate air conditioning and heating for thousands of children, students, staff and animals inside. The windows are large-sized (to meet the historic preservation specifications of the building) and have deteriorated due to age and the coastal conditions: replacement includes properly re-insulating and repainting the walls around them.

**Project Description** - The HMC is requesting \$100,000 in capital funding for an all- purpose work boat. This vessel will provide many services for our harbors. It will tow derelict boats, large floating debris and recover abandoned open water moorings. Also, this craft will install and remove buoys, speed and wake markers, check security cameras and facilitate the rebuilding of municipal docks and finger piers. It can remove small and large floating debris in the harbor and assist the harbor master and marine police in enforcing boating safety. This craft will have ice breaking ability to keep our two commercial harbors open during harsh winters.

Voting District: 20

		Dept Priority	1	Tier	2
HTE Date		YTD Balance			
Encumbered		Amount Available			
Advanced	0.00	Unfunded			

**Project Description** - We are requesting a City of Stamford investment of \$4 million to support the development and construction of our \$10 million Phase II Planetarium & Observatory Center. This investment revitalizes and restores a key pillar of the SM&NC Mission. We are shovel ready and will confidently move forward to construction with the City's \$4 million commitment. In June 2022, we will professionally relocate (flatbed) our historic Gregory Maksutov telescope to the Astronomical Lyceum of the Magdalena Astronomical Society in New Mexico for our continued use "from a distance" in our new building. Our current Observatory, which opened in 1964, has been closed and condemned since October 2018 due to serious disrepair. The building was deemed unsafe, unhealthy, with irreparable conditions. After the telescope is relocated we will demolish the building and prepare the site for new construction. The Planetarium & Observatory Center will be a profound educational and community asset for the City and State. We will bring fresh STEAM programming together in one building for the first time in our 85-year history and be the premier destination for astronomy and science education, a signature of our Mission. This Planetarium & Observatory Center is a true cultural tourism and local economy game-changer for Stamford. Nowhere in the Mid-Atlantic corridor is there an attraction with the features that the Stamford Museum & Nature Center offers.

**Project Description** - During a recent project by EverSource and Aquarion, Bouton Street West was milled for new paving. During this work, it was discovered that the top of the concrete box culvert was significantly deteriorated. Many temporary steel plates were installed to span over the deterioration to support this road. Box culvert replacement required. A place holder has been shown in the outyear request, however the cost estimate will be finalized once design is completed.

## 28 CP0114 STREET LIGHTING INFRASTRUCTURE UPGRADE

Agency: 0220 Operations: Engineering

Contact: Lou Casolo - (203) 977-5796 - NPipicelli@StamfordCT.gov

Location: Citywide

Neighborhood:

Voting District:

		<b>Dept Priority</b>	5	<b>Tier</b>	1
<b>HTE Date</b>	2021-12-07	<b>YTD Balance</b>	22,638.92		
<b>Encumbered</b>	54,960.00	<b>Amount Available</b>	22,638.92		
<b>Advanced</b>	0.00	<b>Unfunded</b>	0.00		

**Project Description** - Conversion of the remaining roadway lighting fixtures (over 5,370) within the city to LED street lights. The majority are lower wattage 50 and 70watt high pressure sodium fixtures which can be upgraded to 15watt LED fixtures. In addition to saving energy, with the longer life of LED products, maintenance costs will be decreased.

		<b>200,000</b>	<b>200,000</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>100,000</b>	<b>100,000</b>	<b>100,000</b>	<b>100,000</b>	<b>100,000</b>	<b>100,000</b>	<b>800,000</b>

**Comments** - Light fixtures will be upgraded to LED fixtures on a spot basis when older fixture ballasts have failed. Over the past three years, requests into Fixl for 'lights out' have averaged 1,002/year with 320 fixtures/year changed to LED. Continuous improvement to roadway lighting which is safer and more reliable. This account is also needed for aging bracket replacements and decorative streetscape fixture replacements for knockdowns in downtown and Harbor Point (without a police report/insurance reimbursement).

Voting District:

		Dept Priority	1	Tier	4
HTE Date	2021-12-07	YTD Balance	0.00		
Encumbered	0.00	Amount Available	0.00		
Advanced	0.00	Unfunded	0.00		

**Project Description** - Amount: \$500,000 Scope: Install infrastructure for an EV Fleet in City yards. Justification: President Biden signed an executive order recently that sets a target for half of all new vehicles sold by 2030 to be zero-emissions capable (including battery electric or BEV, plug-in hybrid electric or PHEV, and fuel cell electric vehicles or FCEV). That EO in conjunction along with his announcement in January about electrifying the government fleet, the City of Stamford needs to begin the development of our own EV infrastructure. There will be grants available as a result of this EO, as well as the infrastructure bill that is due to be passed soon. More than likely there is a good chance every other government and/or private entities will be vying for the funds available. In addition, both the public sector and private sector will be building their infrastructure and starting the process of converting their fleet to zero emissions vehicles leading to long lead times and possibly short supply of vehicles and charging stations. Starting the process as a City project, we can still move towards making our City fleet greener.

<b>HTE Date</b>		<b>YTD Balance</b>			
<b>Encumbered</b>		<b>Amount Available</b>			
<b>Advanced</b>	0.00	<b>Unfunded</b>			

**Project Description** - Scope: Erect 60x100 metal building Justification: Build a 60'X100' metal building behind the vehicle maintenance facility for the storage of vehicles and equipment used for seasonal work such as plow trucks, plows, detachable sanders, leaf vac equipment, blacktop equipment as well as other misc. equipment currently stored out in the elements. Storing vehicles and equipment in an enclosed and heated structure out of the elements would lengthen the life of the equipment as well as reduce maintenance costs and increase uptime. An additional benefit to a garage is snow trucks could be prepped and loaded for an impending storm allowing for the trucks to be out on the road clearing snow and ice quicker.

**Project Description** - The City has 18 recreation fields, all of which are well used, and will have increased demand for usage as the population continues to grow. A study will include assessment of demographics of current and future players, analysis of sports trends, and best practices in field allocation policy according to player ages, seasons, non-profit versus for profit, and adult versus youth. Another important topic of the study will be whether park and school fields should be combined under one administrator for maintenance and allocation.

<b>HTE Date</b>	2021-12-07	<b>YTD Balance</b>	330,920.97		
<b>Encumbered</b>	101,468.78	<b>Amount Available</b>	330,920.97		
<b>Advanced</b>	0.00	<b>Unfunded</b>	0.00		

**Project Description** - This program is required to investigate and assess and correct as necessary of drainage systems discharging into water body, rivers, ponds, etc. and to evaluate Public Services facilities and modify practices in compliance with state and federal regulations. Based upon the requirements set forth in the draft MS-4 permit, significant action is mandated by the CT DEEP.

<b>Encumbered</b>	0.00	<b>Amount Available</b>	50,000.00		
<b>Advanced</b>	0.00	<b>Unfunded</b>	0.00		

**Project Description** - Per MS4 permit this program is intended to isolate sources of contamination. Elimination/abatement of non-stormwater discharge into stormwater system will be evaluated for corrective measures to be implemented. This will allow for a survey of all the City's outfalls to find where all the highest pollutants may be flowing into the rivers and sound. Once this is determined we can find the source of the pollution and eliminate it.

<b>Advanced</b>	0.00	<b>Unfunded</b>	1,000,000.00		

**Project Description** - The City's road network contains more than 12,000 manholes and basins. These structures require periodic reconstruction and adjustment at an average cost between \$8,000 per basin. This work is critical to protect the safety of the public and to maintain the City's investment in the infrastructure.

**Project Description** - This project is to remediate 30 or more tree pitts starting in the downtown area by removing the tree grates and filling the pits with an epoxy stone mix that creates a smooth surface that can absorb water for the tree. This will also provide a smoother walking surface for pedestrians. A few have been down along Bedford Street. This will provide a much safer environment in these highly pedestrian areas.

<b>Advanced</b>	0.00	<b>Unfunded</b>	1,550,000.00		

**Project Description** - The projects listed below outline the improvements the bureau proposes to implement. Of the total request, \$2,300,000 will be used to leverage over \$24,000,000. in grants/ partnership opportunities that the bureau has been able to successfully identify and secure. The remaining \$700,000. would be used to correct deficiencies, improve safety, and further optimize the City's transportation network. To implement measures to improve safety, mobility, and quality of life in residential areas and areas of high pedestrian use. Each year the Bureau identifies or received requests for roadway modifications and improvements. Current requests/identifications, include: Atlantic Street corridor improvements, tied to LOTCIP Grant (\$100,000. Match) Lower Atlantic Street Roadway Improvements LOTCIP Grant (\$150,000 Match - Design) North State Street Roadway Improvements LOTCIP Grants (\$150,000. Match - Design) Lower Summer Street Improvements, Community Connectivity Grant (Match - Construction \$400,000.) Glenbrook at Church TOD Intersection Improvement (\$250,000 Match - Design). Bridge Street Corridor Multi-modal Safety Improvements (\$200,000 Match - Design). Citywide Sidewalk Safe Routes to School (\$500,000 Match - Design for Federal Funding) Davenport Street Reconstruction (Construction Match for Public Private Partnership \$250,000). Forest Street between Bedford and Greyrock Safety and Public Space Improvement Project (Construction Match for Public Private Partnership \$300,000). Newfield Ave at Vine Road Intersection Improvement (Construction \$400,000). Stillwater Road at Palmers Hill Road Intersection Improvements (Construction \$300,000).

**Comments** - Each year the bureau identifies various funding opportunities to leverage investment in the City's transportation network. The sources of this years funding is from State and Federal grants, as well as Development contributions by way of the Bureau's thorough review of site plans. We continue to work with WestCOG and the City's lobbyist to identify other sources.

<b>Encumbered</b>	93.28	<b>Amount Available</b>	195,000.00		
<b>Advanced</b>	0.00	<b>Unfunded</b>	100,000.00		

**Project Description** - To construct sidewalk extensions, to connect missing portions and other priority areas of Stamford as a result of the Traffic Calming Plan, and the Bicycle and Pedestrian plan. Sidewalk extensions projects are often focused around school locations as students are not bused within a mile of school. Various safety improvements are incorporated to sidewalk projects such as crosswalks, bump outs, and street trees.

<b>Advanced</b>	0.00	<b>Unfunded</b>	150,000.00		

**Project Description** - This project will accommodate implementing elements of the comprehensive Bicycle and Pedestrian Plan adopted in 2019. Implementation of this plan will be completed under different phases to contribute to a Complete Streets strategy for building a safe, effective, and well utilized bicycle and pedestrian network throughout the City. In addition, this will allow the Bureau to begin work on a formalized Vision Zero plan.

**Comments** - 1.) The current 25 year old 1997 Parker 21ft. Center console Outboard has a cracked transom due to age and wear and tear. The cost to repair is more than the boat is worth and would not be sea worthy as a patrol / rescue boat. Requesting to upgrade to a police specific patrol / rescue boat. 2.) The current Police Command Vehicle was purchased in 2006. The vehicle itself is in good mechanical repair, however, the electronics, radios, computers, cameras, and other technology are now 15 years outdated. The interior workspaces are worn and need to be replaced as well.

**Project Description** - We are utilizing an apparatus replacement schedule where front line vehicles are in service for approximately ten years. Once an apparatus is removed from front line service it is utilized as reserve for additional years. Fire apparatus approaching or exceeding 15 to 20 years of age, corrosion, metal fatigue and crystallization in concealed areas can result in serious consequences. For this reason we are prioritizing this request as 1. We are requesting \$1,400,000 to replace truck 2 and \$300,000 to replace engine 71. The current Truck 2 is high maintenance, is out of service for extended periods of time and is becoming cost prohibitive to maintain. The current lead time for the replacement is 18 months causing major concerns as it will not be available until 2024. We are also partnering with the Long Ridge Fire Company to replace their front line pumper E71. It is a 1996 that is 25 years old and per NFPA standards can not be a front line pumper. The partnership with LRFD will be a 50/50 split. City will maintain ownership. We also need to replace an engine to catch up to our scheduled replacement of engines. Engines are the basic fire department response vehicle, otherwise known as a pumper truck. The city owns 13 front line Engines and 3 reserves. Replacement is also needed in the Volunteer Fire Companies.

**Project Description** - The water company is replacing and improving several water mains throughout the city. As they replace the water mains we replace the old hydrants connected to the old mains. Funds will be used to maintain all hydrants and replace damaged and/or inoperable fire hydrants to assure water supply. Also add new hydrants for new water mains added to system. The construction portion of these ongoing obligations are: digging out existing plumbing and hydrants, road, and sidewalk repairs to restore to previous condition. We have met with the water company and created a priority replacement that is currently being done.

**Project Description** - The current radios are past their service life and can no longer be repaired. As other cities and towns we recently switched to the state radio system to provide state wide coverage and a more redundant system. The state is currently a P25 phase 1 and phase 2 system but is looking to have all subscribers upgrade to phase 2. Our current outdated equipment is not phase 2 capable. Radios are 6k each

**Project Description** - In order to harden our infrastructure and make sure they always have power a generator tap box will be required at all of our fire stations. A trailer mounted 150KW will also be required to be used with the tap boxes. Generator tap boxes are permanently mounted on the outside of a building. They play a vital role in connecting the electrical system of the firehouses to the portable generator in order to deliver temporary (and even long-term) electrical power. It is electrically connected to a manual transfer switch or an automatic transfer switch—temporary power, made easy.
