**Density, Permitted** (221-11)

For purposes of compliance with these Regulations, the *Permitted Density* for development on a *Lot* in any given Zoning District within the City of Stamford shall be determined as follows:

[...]

3. In mixed-use Zoning Districts where the *Permitted Density* is defined by *Floor Area Ratio* for non-residential uses and by square feet per Family for residential uses, the maximum aggregate number of Dwelling Units shall be calculated by adding (i) the *Residential Density* in number of Dwelling Units to (ii) the number of Dwelling Units resulting from conversion of non-residential *Density* to Dwelling Units. Conversion of non-residential *Density* into Dwelling Units where permitted, is determined by **dividing the Floor Area permitted for non-residential uses by 1,000 in the CC Center City District and 1,500 in all other applicable districts.** ~~applying the conversion factors as defined in the respective Zoning Districts or the bonus provisions in Section 7.S. of these Regulations, or (y) if no such conversion factors are provided, by dividing the non-residential floor area (in square feet) by 1,500.~~ No conversions of *Residential Density* into non-residential *Density* shall be permitted unless otherwise provided in these Regulations.

**Commented [BR1]:** This conversion is currently permitted in the CC District pursuant to Section 7.S. Because 7.S. is deleted, this needs to be updated.
