RE: Notice of Blue Light Towers
-Mill River Greenway

In accordance with the Camera Review Committee's Policies and Procedures, Section 7, please accept this letter as a request from the Transportation, Traffic and Parking Department, for additional Blue Light Emergency Towers.

The Mill River Greenway is frequently visited by residents and families throughout the year. We believe that the addition of these Blue Light Towers would increase security and create an additional presence in the Greenway. The location of the towers is based on park usage, topography, and the experience provided by the City of Stamford and the Stamford Police Department.

Blue Light Emergency Towers are installed to improve safety and act as a security precaution in Stamford parks. By having these highly visible, easily accessible phones with cameras, the park goers will be reassured that they can summon police, fire or medical assistance immediately.

We are requesting that these cameras would be Surveillance Level 2 (disclosed Public Surveillance Cameras without a Public Feed and without Monitored Surveillance or without pre-authorized Monitored Surveillance less than 8 hours per week)

Thank you for considering this request. If you have any questions, please call me directly at 203-977-5675.
